

Holland Hospital completes 10-month-long Cath Lab build out

HOLLAND, MI – **This past week Holland Hospital opened its new Cardiac Catherization Lab Suite after a 10-month-long construction process.** The project includes the creation of new Cardiovascular and Special Procedure Rooms, a 10-bed Cardiac Short Stay Unit, a dedicated waiting room, 2 Inpatient Holding Bays, and staff support areas. The department relocation will significantly enhance the patient experience, workflow efficiency, increase staff satisfaction and position the hospital as a leader in cardiac care and diagnostics. M&CA provided all the architecture, planning, and interior design, working closely with the construction team, including the Owner, Contractor and Consultants to create a unique environment in a medical office building originally designed by Matthei & Colin Associates and completed in July, 2014.

Holland Hospital is the leading hospital in the West Michigan lakeshore area, serving the health care needs of the greater Holland area and surrounding communities throughout Ottawa and Allegan counties. The nonprofit hospital was founded over 90 years ago and has expanded as the needs have grown. Their commitment to top-quality care is backed by an investment in the most advanced technology and treatment for patients. Healthgrades has designated Holland Hospital one of the 50 Best Hospitals in America for three years in a row.

Matthei & Colin Associates, LLC (M&CA) has specialized in the planning and design of health care environments since 1974. Through the passion of our creative effort, we have emerged today as one of the nation's few firms exclusively committed to health care architecture. Our singular focus on designing and creating health care environments and our productive client partnerships result in highly individualized planning recommendations to address the requirements of each project.
