M&CA Completes Ortho-Spine/ICU Project

Chicago, IL - Edward Hospital recently opened a two-floor addition to the West Building on its Naperville, IL campus. The \$40.9 million (project cost), 66,250 square foot project, which started mid-2012 and took about two years to construct, features a new Orthopedic & Spine Center and Intensive Care Unit. The Orthopedic & Spine Center includes 36 private patient rooms, a Rehab Gym and centralized nursing stations. The Intensive Care Unit has 24 private patient rooms with state-of-the-art monitoring equipment and computers at each bedside with the capability to view patient information and imaging so nursing staff and physicians do not have to leave the room. Both new floors feature conveniences for patients and families, including a sleeper sofa for family members; spacious family waiting areas, and consultation rooms for physicians to meet with family members. Matthei & Colin Associates provided all planning, architectural and interior design services for the project.

Edward Hospital and Health Services is a full-service, regional healthcare provider offering access to complex medical specialties and innovative programming. One of the larger integrated health systems in the state of Illinois is comprised of three hospitals – Edward, Elmhurst Memorial and Linden Oaks at Edward. With revenues of about \$1 billion and more than 50 outpatient locations across a service area of 1.7 million residents, the system employs nearly 7,700 and has more than 1,680 physicians on staff. Edward is the most preferred hospital in the region (National Research Corp. 2012 survey) and is one of the nation's 100 Great Hospitals according to Becker's Hospital Review. Edward was re-designated as a Magnet hospital for nursing excellence in 2010, earning its original designation in 2005 and was the first hospital serving Dupage and Will Counties to achieve Magnet status.

Since 1974, Matthei & Colin Associates (M&CA) has specialized in the planning and design of health care environments. Through the passion of our creative effort, we have emerged today as one of the nation's few firms exclusively committed to health care architecture. Our singular focus on designing and creating health care environments and our productive client partnerships result in highly individualized planning recommendations to address the requirements of each project.
